## I. Unity Certified Programmer

### **Unity Certified Programmer**

The Unity Certified Programmer credential, offered by Unity Technologies, is designed for individuals seeking to validate their skills in programming within the Unity engine, a leading platform for game development. This certification assesses a candidate's ability to write clean, efficient code, solve complex programming problems, and implement Unity's features effectively. It's ideal for professionals aiming to demonstrate their technical proficiency to employers in the gaming and interactive content industries, covering topics from core programming concepts to advanced scripting and optimization.

## II. Unity Student Plan

### **Unity Student plan**

Access the real-time 3D development platform used by professionals to create immersive experiences. Eligibility: Free for students 16+ enrolled in accredited educational institutions, consenting to data collection and processing.
